## DISCUSSION

The Old Standard Industries site is a 12 acre site that has had several industrial uses since the 1930s. The site has been used as a tannery, lead smelter, battery manufacturer, and a solvent reclamation facility. The site has had over 53,000 cubic yards of contaminated soil remediated and is still undergoing further remediation under the auspices of the state's RCRA program.

Since the site is currently being remediated under the proper RCRA jurisdiction and an imminent threat does not exist, the Old Standard Industries site is designated a disposition of No Further Remedial Action Planned (NFRAP), and at this time does not warrant further investigation under Superfund.

This site is being referred to the State of Texas for further action under the state's RCRA regulations.

## APPROVALS

Disposition Recommended by: Lon Biasco

(Site Assessment Manager)
